Zarqa, Jordan

About Me

Recent Computer Science graduate with strong interest in Cybersecurity, Threat Analysis, and Network Security. Experienced in developing systems using .NET and applying Machine Learning concepts. Currently strengthening my knowledge in SIEM, Incident Response, and networking (CCNA, CEH). Highly motivated to learn and grow in SOC environments.

Technical Skills:

- Cybersecurity & Networking
- Basic understanding of SIEM concepts (log monitoring & alerts)
- Familiar with Incident Response lifecycle
- Basic knowledge of Threat Analysis & Vulnerability concepts
- Networking fundamentals (TCP/IP, DNS, HTTP/HTTPS)
- Basic Log Analysis
- Basic understanding of Security Monitoring

Programming

- C# (ASP.NET MVC)
- Python (Machine Learning basics)

Tools & Technologies

- Visual Studio
- SQL Server

Soft Skills:

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Fast Learner

Education

Bachelor of Computer Science
Al-Zarqa University | 2020 – 2025

Certifications:

- CCNA – Self Study (In Progress)
- CEH – Self Study (Reviewing Fundamentals)

Projects

Graduation Project – AI + Security-Based System

- Developed a system integrating Machine Learning models with secure data handling concepts
- Applied basic security considerations in system design
Focused on improving system reliability and data protection

Hospital Management System — ASP.NET MVC

Developed a hospital management system using MVC architecture with role-based access, patient records, appointment scheduling, and database integration.

Technologies: C#, ASP.NET MVC, SQL Server

Machine Learning Classification Model — Python

Built and trained ML models using a Kaggle dataset to classify categories based on input features. Applied preprocessing, model selection, and evaluation metrics.

Technologies: Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook

E-Commerce Website — Front-End Web

Developed a functional online shop with product listing, filters, responsive UI, and shopping cart using front-end technologies.

Technologies: HTML, CSS, JavaScript

Salary Budgeting Mobile App — Android Studio

Designed and built a mobile application that helps users track spending, manage salary allocation, and visualize budget reports.

Technologies: Java, Android Studio, SQLite

Relevant Training & Activities

Machine Learning & AI using Python — The Hope International Company (3 hours), 2024

PMP & Digital Marketing Event — The Hope International Company (2 hours), 2024
